## SUMMARY

I'm working towards my goal of being a great Software Engineer/Developer. I'm a driven and detail-oriented aspiring software engineer/developer with a Diploma in Information Communication Technology. Proficient in web development, with expertise in front-end technologies such as HTML, CSS, and JavaScript, as well as back-end framework like Node.js. My interest in this field started off back in High School when I was doing CAT which also dealt a bit with Web development from there I continued learning and staying updated with emerging technologies to drive innovation and enhance productivity. I am ready to leverage technical expertise and problem-solving skills to contribute to dynamic software development teams.

---

## EXPERIENCE

**November 2023 to March 2024**

### **Freelance Web Developer**

#### **Self Employed**

During my time as a Software Engineer/Developer, I worked as a freelancer, taking on projects and collaborating with a client to deliver solutions. I utilized my skills in SQL, Java, JavaScript, and HTML/CSS to develop ICT solutions that met the unique needs of each client. Planned the stages for the ICT development lifecycle, from gathering requirements and designing architecture to implementing and testing the software. Through this experience, I honed my problem-solving skills and learned how to work effectively constantly seeking opportunities for growth and learning.

- Scheduled meetings with clients to discuss website design preferences and requirements.
- Used JAVA, HTML and CSS to structure web pages and systems and provide smooth navigation of internet.
- Troubleshoot website on different browsers to determine quality.

---

## EDUCATION

February 2021 – December 2023

**Sol Plaatjie University – Kimberly, NC**

**Qualification:** Diploma in Information Communication Technology

**Major:** Computer Programming, System Analysis and Design

This qualification features a range of professional and personal development initiatives relevant to the ICT industry and the promotion of lifelong learning skills. Qualifying for this will therefore be proficient in the general discourse of ICT but have specialized knowledge and skills that are focused on Applications Development.

---

## Skills

- I am proficient in programming languages such as (Java, JavaScript, PHP, Python)
- I am proficient in skills related to web development. (HTML, CSS, Responsive Web Design)
- I have an understanding on how to design, implement and interact with databases such as MySQL and SQLite
- I have an understanding in Using IDEs such as Visual Studio Code And NetBeans for Java. I also have experience with code source tools like GitHub.
- Communication, I am effective in communication with team members and clients so that I can understand requirements.
- Problem-Solving, I can solve problems and come up with innovative solutions and approaches.
- Time Management, I am efficient in time for coding, testing and documentation.
- Resilience, I can learn from failures and bounce back.
